Re: Petition for Rulemaking to Amend the Table of Allotment

Dear Ms. Salas:

Enclosed is an original and six copies of a Petition for Rulemaking to Amend the Table of Allotments of FM Broadcast Stations. An additional copy is also enclosed for date-stamping, which I would appreciate you returning to me in the enclosed envelope.

If you have any questions regarding this filing, please feel free to contact me.

Sincerely,

Bradford D. Carey

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Petition for Rule Making

Amaturo Group of L.A., Ltd ("Amaturo"), through counsel and pursuant to Sections 1.401 and 1.420 of the Commission's Rules, hereby petitions the Commission to amend section 73.202(b), the Table of Allotments of FM Broadcast Stations, by

- (1) re-allotment of channel 224A from Avalon, California to Fountain Valley, California and modification of Amaturo's license for station KLIT, channel 224A, Avalon, to specify operation on the channel at Fountain Valley;¹ and,
- (2) re-allotment of channel 224A from Riverside, California to Adelanto, California and modification of Amaturo's license for station KELT, channel 224A, Riverside, to specify operation on the channel at Adelanto;²

¹ Pursuant to Section 1.420(i), the proposed allotment change can be accomplished without competition from other applicants because the Fountain Valley allotment is mutually exclusive with the present Avalon allotment.

² Pursuant to Section 1.420(i), this proposed allotment change also can be accomplished without competition from other applicants because the Adelanto allotment is mutually exclusive with the present Riverside allotment.

To accommodate these changes, Amaturio seeks modification of section 73.202(b) of the Commission's Rules and Regulations by

(3) substitution of channel 224A for channel 224B1 at Ridgecrest, California and modification of the license of station KZIQ-FM accordingly; and,

(4) specification of revised reference coordinates for station KMLT, Thousand Oaks, California.

A Technical Exhibit prepared by David E. Dickmann in support of this Petition demonstrating that the changes sought may be implemented in compliance with the Commission's technical rules is annexed hereto as Exhibit One.

Amaturio is the licensee of all of the stations involved, except KZIQ-FM, Ridgecrest. James L. Knudsen & Donna L. Knudsen ("Knudsen"), the licensee of KZIQ-FM, has consented to the down-grade of KZIQ-FM as part of this proceeding provided that the other modifications sought herein by Amaturio are granted. A copy of the consent of Knudsen is annexed to this Petition as Exhibit Two.

I. THE CHANGES CAN BE MADE IN FULL COMPLIANCE WITH THE COMMISSION'S TECHNICAL RULES.

A. All Proposed Allotments Are Fully Spaced.

Under the proposal, channel 224A can be re-allotted from Avalon to Fountain Valley³ and from Riverside to Adelanto in full conformance with the Commission's technical rules including the minimum distance spacing requirements. To accommodate the Fountain Valley and Adelanto allotments, Amaturro proposes to down-grade station KZIQ-FM at Ridgecrest from channel 224B1 to channel 224A⁴ and change the reference coordinates of station KMLT, Thousand Oaks.

Full spacing studies demonstrating compliance with the spacing standards, based on the new reference coordinates⁵ for stations KLIT, KELT, KMLT and KZIQ-FM are provided in the Technical Exhibit.

³All communities are in the state of California.

⁴New allotment reference coordinates are also proposed.

⁵The Technical Exhibit demonstrates that there is an area for each allotment, in which a fully spaced transmitter site can be placed. The "reference coordinates" are located in this fully spaced area.

B. From Each Allotment Reference Site, A 70 dbu Signal Can Be Placed Over The Entire Community of License.

The Technical Exhibit demonstrates that a Class A facility⁶ located at the reference site of each new allotment can place a city-grade signal over the station's entire community of license.

II. THE PUBLIC INTEREST BENEFITS OF THE PROPOSED CHANGES ARE COMPELLING.

The public interest will be well served by adoption of the proposed changes to the table of allotments.

A. Two Communities Will Gain Their First Local Transmission Service.

Presently, neither Adelanto⁷ (population 8,517)⁸ nor Fountain Valley⁹

⁶For allotment purposes, a station operating at the class A maximum 6 kW effective radiated power with an antenna height above average terrain of 100 meters is assumed. *See Greenup, Kentucky and Athens, Ohio*, 68 RR 2d 1437 (1991). Terrain is assumed to be uniform. Population counts and land area tabulations for proposed and existing allotments are based on these assumptions.

⁷Adelanto was founded in 1915 by E. H. Richardson, the inventor of what became the Hotpoint Electric Iron. *See Adelanto materials*, annexed hereto as Exhibit 3B. In 1970, it moved from a Community Services District to an incorporated city, which now encompasses 52 square miles. Adelanto has its own Chamber of Commerce, which was formed in 1956 and its own police force with 30 full-time, sworn officers, seven reserve officers and a support staff. The Adelanto Fire Department has two stations. The City of Adelanto owns and operates its own water utility

⁸All populations unless other wise noted are based on 1990 census.

⁹Fountain Valley was incorporated "41 years ago." *See materials provided by the City of Fountain Valley* annexed hereto as Exhibit Three A. The City of Fountain Valley provides the usual governmental services, including water delivery and trash pick-up. It covers 9.75 square miles, has a city motto, tree, flower and civic center. A large number of organizations, including a Fireman's Association, Education Council, Toastmaster's

(population 53,691) have any aural broadcast transmission services¹⁰. Allotment of at least one channel to each community for self-expression is an important goal of the Commission. Thus, the allotment changes proposed in this Petition *ipso facto* further the public interest. Stations KISL (channel 204A) and KBRT (740 kHz) will remain at Avalon. Four FM and two AM stations will remain at Riverside. Thus, Neither Riverside nor Avalon will be deprived of local aural transmission services if the proposed changes are implemented.

B. 1.4 Million People Will Gain An Additional Reception Service.

Amaturo's studies of the areas and populations to be served by each station under the proposed allotment scheme indicate that the four stations collectively will add service to more than 2.3 million persons. Fewer than 900,000 people will lose service from one station. All of the persons who will lose one service will still receive service from five or more aural services, except that 107 people will continue to receive four aural services. These minimal losses are more than off-set by gains. 182 people will gain their fourth and 506 people will gain their fifth aural service.

Association, Little League, Police Association and Historical Society call Fountain Valley home. *id.* There are nursing homes, apartment houses, motels and numerous churches in Fountain Valley.

¹⁰ Since neither Fountain Valley nor Adelanto is part of an urbanized area, no issues pertaining to movement of service to an urbanized area are presented. Moreover, the public interest is furthered by allotment of a station to a community, distinct from the urbanized area's core, notwithstanding that it is part of an urbanized area. Thus, even were either Fountain Valley or Adelanto part of an urbanized area, such fact would not negatively impact the instant proposal. *See e.g. Canovanas, etc., Virgin Islands*, 8 CR 1169 (1997).

C. Grand-fathered Interference Areas With More Than 1.5 Million People Will Be Eliminated.

There are 307,100 people in that portion of the 60 dBu (50,50) contour of station KELT that is overlapped by the KXFG 54 dBu (50, 10) contour and 1,248,718 people in that portion of the KELT 60 dBu contour that is overlapped by the KKUU 40 dBu (50, 10) contour. 259,479 people are in that portion of the KXFG 60 dBu contour (50, 50) that is overlapped by the KELT 54 dBu contour and there are 168,085 people in that portion of the KKUU 60 dBu contour (50, 50) that is overlapped by the KELT 54 dBu (50, 10) contour. Each of these interference areas arose due to rule changes and is "grand-fathered."

Implementation of the changes proposed in this Petition will result in the elimination of all of these overlap areas, in which there is a cumulative population of more than 1.4 million people.

III. ADOPTION OF THE PROPOSED CHANGES WILL RESULT IN A MORE PREFERENTIAL ARRANGEMENT OF ALLOTMENTS.

The changes to the table of allotments proposed herein will result in a more preferential arrangement of allotments and a more equitable distribution of broadcast stations among the various communities as contemplated by Section 307(b) of the Communications Act.

A. No Community Will Lose its Only Local Transmission Service.

As discussed above, and tabulated in the Technical Exhibit, the two communities from which allotments are to be removed will continue to have local aural transmission services. Avalon will continue to have one AM and one FM¹¹ station. Furthermore, these stations are competitive, not co-owned.¹² Riverside will continue to have four FM and two AM stations.

B. No White or Grey Areas Will Be Created.

As also discussed above, and tabulated in the Technical Exhibit, no white or grey areas will be created. The loss of a fifth aural service by 107 people is more than off-set by the 182 people that will gain a fourth aural service and the 506 people that will gain a fifth local service. Further, a net population of 1.4 million persons will gain an additional competitive local service.¹³

¹¹In performing an analysis under Section 307(b) of the Communications Act of 1934, as Amended, noncommercial educational stations are to be included. Valley Broadcasters, Inc., 67 RR 2d 937 (1990).

¹²Amendment of the Table of Allotments to move an FM service to a community which will receive its first local transmission service is in the public interest even where the remaining service in the community from which the allotment is to be deleted is a daytime only AM station. (Willows and Dunnigan, California, 1 CR 993 (Chief, Allocations Branch, 1995).

¹³See Heartland Radio, Inc., 2 CR 449 (1996).

IV. IF GRANTED, THE MODIFICATIONS WILL BE IMPLEMENTED.

Amaturo commits that if the Commission adopts the changes proposed herein, applications will be promptly filed for construction permits to specify operations on the new channels and at the revised reference coordinates and, if construction permits are granted, facilities will be constructed and operated on the revised allotments.¹⁴

V. CONCLUSION: THE PUBLIC INTEREST WOULD BE SERVED BY ADOPTION OF THE PROPOSED MODIFICATIONS TO THE TABLE OF ALLOTMENTS AND THE COMMISSION SHOULD PROCEED WITH A RULE MAKING PROCEEDING TO ADOPT THEM.

In view of the foregoing, it is clear that the public interest would be well served by implementation of the changes proposed in this Petition. Grand-fathered interference areas would be removed, two communities would get their first radio transmission services and a large number of people would gain another audio service.

It is respectfully submitted that the changes proposed in this Petition and the attached Technical Exhibit are fully consistent with the Commission's policies and rules.

¹⁴The written agreement of the licensee of KZIQ to implement the changes proposed is attached hereto.

Wherefore, premises considered, it is respectfully urged that the Commission accept this Petition for Rule Making, issue a Notice of Proposed Rule Making and, after due proceedings, amend 47 C.F.R. §730202(b), the Table of Allotments of FM Broadcast Stations, as follows:

<u>City (all California)</u>	<u>Present</u>	<u>Proposed</u>
Avalon	204A, 224A	204A
Fountain Valley	--	224A
Riverside	202A, 209A, 224A, 248B, 256B	202A, 209A, 248B, 256B
Adelanto	--	224A
Ridgecrest	224B1, 285 B1	224A, 285B1

at the reference coordinates specified and change the allotment reference coordinates for station KMLT, Thousand Oaks as specified in the Technical Exhibit.

Respectfully Submitted,
Amaturo Stations of LA LTD.

EXHIBIT ONE

Technical Exhibit

TECHNICAL EXHIBIT
IN SUPPORT OF
A PETITION FOR RULE MAKING
TO AMEND THE FM TABLE OF ALLOTMENTS
AVALON, FOUNTAIN VALLEY, RIVERSIDE,
ADELANTO AND RIDGECREST, CALIFORNIA

Technical Narrative

This technical narrative and associated exhibits have been prepared on behalf of the Amaturo Group of L.A., Ltd. (herein "Petitioner") in support of a Petition for Rule Making to amend Section 73.202(b) by the re-allotment of channel 224A from Avalon, California to Fountain Valley, California, as that community's first local service*, and the modification of the license of station KLIT on channel 224A at Avalon, California accordingly (BLH-921202KG). Petitioner also requests the re-allotment of channel 224A from Riverside, California to Adelanto, California, as that community's first local FM service, and the modification of the license of station KELT accordingly (BLH-970715KC). Petitioner further requests that channel 224A be substituted for channel 224B1 at Ridgecrest, California, and that the license of station KZIQ-FM be modified accordingly (BLH-900403KB). As the requested change to channel 224A at Fountain Valley is mutually exclusive with the present allotment of channel 224A at Avalon, and as the requested change to channel 224A at Adelanto is mutually exclusive with the present allotment of channel 224A at Riverside, Petitioner invokes the provisions of Section 1.420(i).

In order to accommodate the changes as proposed above, petitioner also requests a change in the allotment reference point for channel 224A, Thousand Oaks, California.

* It is noted that Fountain Valley is outside the Los Angeles urbanized area as identified in the 1990 U.S. Census.

This proposed change does not require an amendment to the FM Table of Allotments as channel 224A is already allotted to Thousand Oaks. All proposed allotment reference points and the distances between them are shown in the attached Figure 1.

The following are some merits of the reallocation proposal:

- The community of Fountain Valley, California (1990 population 53,691) will be provided with its first local aural transmission service and Avalon, California (1990 population 2,981) will not be deprived of its sole "existing" local service as there will remain one FM assignment and one AM assignment at Avalon, namely, FM station KISL, channel 204A, and AM station KBRT, 740 kHz.
- The community of Adelanto, California (1990 population 8,517) will be provided with its first local aural transmission service and Riverside, California (1990 population 226,505) will not be deprived of its sole "existing" local service as there will remain four FM assignments and two AM assignments at Riverside.
- No "white" or "grey" areas will be created or eliminated because of the changes proposed.
- The proposal will eliminate a "grandfathered" short-spacing between stations KLIT, Avalon and KMLT, Thousand Oaks.
- The proposal will eliminate a "grandfathered" short-spacing between station KELT and station KXFG, channel 225A, Sun City, California.
- The proposal will eliminate a "grandfathered" short-spacing between station KELT and station KKUU, channel 224A, Indio, California.

Proposed Change in Table of Allotments

The changes in the FM Table of Allotments, as proposed herein, are summarized in the following table:

<u>City</u>	<u>Present</u>	<u>Proposed</u>
Avalon, California	204A,224A	204A
Fountain Valley, California	--	224A
Riverside, California	202A,209A,224A, 248B,256B	202A,209A, 248B,256B
Adelanto, California	--	224A
Ridgecrest, California	224B1,285B1	224A,285B1

No changes in the allotments at Thousand Oaks, California are proposed, herein, simply a change in the allotment reference coordinates for channel 224A (FM station KMLT).

Compliance With FCC Rules

Attached as Figure 2 are tabulations and maps showing required separations pertinent to use of the channels at each of the proposed allotment reference points. The reference sites comply with the Commission's minimum distance separation requirements contained in section 73.207 to all existing, authorized and proposed stations and allotments. All proposed sites are suitable for transmitter facility construction.

Figure 3 contains maps showing the principal community contours for all proposed allotment reference sites along with the city limits of each allotment city. Operation from the reference sites will provide the requisite city grade signals to all of the proposed allotment communities. The city limits shown in Figure 3 were obtained from the 1990 U.S. Census of Population. For all facilities the 3.16 mV/m contours are based on maximum facilities, and uniform terrain in all directions was assumed.

Pursuant to Section 1.420(i), the Commission will consider petitions to modify the license/construction permit of an FM station to specify a new community if the proposed

allotment would be mutually exclusive with the present assignment. As the entire area to locate for channel 224A at Fountain Valley would be short-spaced to the licensed KLIT operation on channel 224A, and as the entire area to locate for channel 224A at Adelanto would be short-spaced to the licensed KELT operation on channel 224A at Riverside; the new allotments are mutually exclusive with the existing allotments.

Gain and Loss Areas and Available Aural Services

Figure 4, attached, is a map showing the FM 1 mV/m primary service contours for all the licensed and proposed facilities. For all facilities the 1 mV/m contours are based on maximum facilities and uniform terrain in all directions, was utilized. The 1 mV/m "gain" and "loss" areas are also indicated.

Figure 5 includes maps showing the other existing aural services over the existing and proposed 1 mV/m coverage areas shown in Figure 4¹. No "white" (zero services) or "grey" (one service) areas will be created or eliminated as a result of the proposal. Within the gain and loss areas, the number of other, existing services are shown in under-served areas (fewer than five other, existing services) but not in fully-served areas (five or more other, existing services).

As can be seen in Figure 5, Sheets 1 and 3, there are five or more other existing aural services over the entire areas for the licensed and proposed allotments for KLIT at Avalon and Fountain Valley and for the licensed and proposed KMLT at Thousand Oaks. Therefore, no under-served areas will be created or eliminated as a result of these two proposed changes.

¹The determination of available reception services was based on the criteria set forth in footnote 1 of the Notice of Proposed Rule Making in MM Docket No. 96-219 (DA 96-1774; adopted October 25, 1996, released November 1, 1996).

Sheet 2 of Figure 5 shows the existing 1 mV/m coverage area for KELT at Riverside and the proposed 1 mV/m coverage area for KELT at Adelanto. As can be seen in the Figure, no under-served area will be created as a result of the proposed change, but under-served areas will be eliminated.

Sheet 4 of Figure 5 shows the existing 1 mV/m and the proposed 1 mV/m coverage area for KZIQ-FM at Ridgecrest. As can be seen in the Figure, under-served areas will be created and eliminated as a result of the proposed change.

Sheet 5 of Figure 5 is a key for identifying the other services shown on Sheets 2 and 4. In all cases, the 1 mV/m service contours based on class reference facilities were used for all commercial band FM stations (channels 221 through 300). The 1 mV/m contours based on actual facilities were used for all reserved band FM stations (channels 201 through 220). The 0.5 mV/m groundwave contours were used for Class A AM stations, and the nighttime interference-free groundwave contours were used for all other AM stations.

A summary of the gains and losses in area and population along with the number of other existing services is included in the table in Figure 6.

Determination of Coverage Contours

The FM predicted coverage contours were calculated in accordance with the provisions of Section 73.313, except that uniform terrain was presumed in all directions for commercial band FM stations. Distances to AM contours were based on either nondirectional radiation pattern values or standard radiation pattern values obtained from the FCC's AM database. FCC Figure M-3 conductivity employed along all azimuths.

Determination of Population and Area

The population within each FM primary service contour (1 mV/m) and each gain, loss, reception and interference area was calculated using a computer program that utilizes the 1990 U.S. Census database of "population centroids". The program adds the populations of those U.S. Census designated areas whose centroid was within each service area. The area within each FM primary service contour was calculated using a root mean square algorithm.

Interference Reduction

As previously mentioned, the proposal will eliminate existing short-spacings between station KELT and stations KXFG, channel 225A, Sun City, California and KKUU, channel 224A, Indio, California. Figure 7, Sheet 1 contains an allocation study for the licensed KELT and identifies the short-spaced stations. With the proposed re-allotment of KELT to Adelanto, these two short-spacings are eliminated.

It is also noted that considerable overlap of the predicted coverage and interfering contours of the stations exists. Sheet 2 of Figure 7 contains a map showing the coverage and interfering contours for KELT, KXFG and KKUU. The extent of the contour overlap can be clearly seen on the map. Sheet 3 of Figure 7 contains a tabulation summarizing the existing overlap areas and the population in each of those areas. As a result of the proposed re-allotment of KELT from Riverside to Adelanto, the existing overlap will be eliminated.

Conclusion

Channel 224A can be reallotted from Avalon, California to Fountain Valley, California in compliance with all applicable Commission Rules. In addition, channel 224A can be re-allotted from Riverside to Adelanto, California in compliance with all applicable Commission Rules. Channel

224A will remain allotted to Thousand Oaks, California and channel 224A can be allotted, instead of channel 224B1, to Ridgecrest, California. All allotments will be fully-spaced under Section 73.207 of the Commission Rules. The proposal will result in first local, aural broadcast services to Fountain Valley and Adelanto. The proposal would not deprive Avalon or Riverside of local broadcast service. The proposal will not create any "white" or "grey" areas. Therefore, Petitioner requests the re-allotment of channel 224A from Avalon to Fountain Valley, California (and the modification of the Petitioner's license for station KLIT accordingly), the re-allotment of station KELT from Riverside to Adelanto, California (and the modification of the Petitioner's license for station KELT accordingly), the substitution of channel 224A for channel 224B1 at Ridgecrest, California, and a change in the allotment reference coordinates for channel 224A at Thousand Oaks, California.

EXHIBIT THREE

A

Fountain Valley, CA

CITY OF FOUNTAIN VALLEY

CITY HALL 10200 SLATER AVENUE FOUNTAIN VALLEY, CALIFORNIA 92708

THE OFFICE OF THE MAYOR

January 1999

Dear Prospective Resident:

On behalf of the City Council and our dedicated City employees, I welcome the opportunity to tell you about the City of Fountain Valley. Incorporated 41 years ago, our City has grown into a dynamic community of approximately 55,000 with an average age of 33 years. Fountain Valley is an active community, and the participation of residents in governing our City is encouraged.

Fountain Valley is served by outstanding schools from preschool through college. Excellent shopping centers are available throughout the City, and we encourage you to "Shop Fountain Valley" whenever possible. Tax dollars spent here ultimately support Fountain Valley emergency services (Police, Fire and Paramedics); public services (street maintenance and traffic improvements); and leisure services (youth and senior programs).

Most Fountain Valley neighborhoods have a park nearby for use by young and old alike. An exceptional recreational program is available to all residents, with many activities available at Mile Square Regional Park and the Fountain Valley Recreation and Cultural Center located in our City.

In keeping with the dreams of our founding families, Fountain Valley's recently updated General Plan provides a blueprint for stability with a plan for orderly growth and preservation of the environment which brought many of us here.

We would be happy to welcome you as a resident in our community. If you have questions about City services, please call City Hall at (714) 593-4400.

Sincerely,

John J. Collins
Mayor

Fountain O'Valley Mayor's Ball

Tim Smith, CEO at Fountain Valley Regional Hospital & Medical Center, gives 10 reasons why we're glad to have an Irish Mayor.

*Fountain Valley City Council
Top, left to right: Councilmember Larry Crandall, Mayor Pro Tem Guy Carrozzo, Councilmember Chuck Conlosh
Bottom, left to right: Councilmember Laurann Cook and Mayor John Collins*

TOP 10 REASONS WE'RE GLAD TO HAVE AN IRISH MAYOR

- 10 Business license and city taxes are waived for any business with the name Shamrock, O'Kelly or Collins.
- 9 Whiskey is served at all meetings.
- 8 John is actively recruiting the Boston Celtics to Fountain Valley.
- 7 Larry Bird and Pope pictures are prominently displayed at City Hall.
- 6 Traffic citations are not issued to anyone in a Notre Dame sweatshirt.
- 5 Costco is changing its name to O'Costco.
- 4 All police and fire department uniforms are changing to green effective January 1, 2000.
- 3 John has seriously considered changing the name of the city to Finian's Valley.
- 2 All council meeting will be held at Silky Sullivan's.
- 1 St. Patrick's Day is a paid holiday in the city of Fountain Valley.

Mayor's Ball continued on page 2.

Pictured at right: Chairman of the Board Dave Osborn (left) gives a token of appreciation to Mayor's Ball Co-Chairs Ruby Yap and Kathleen O'Brien, while Bob Richardson, Master of Ceremonies, looks on.

EXHIBIT THREE

B

Adelanto, CA

Services

Police

Adelanto is the only High Desert city to boast its own police force. The department currently employs 30 full-time, sworn officers, seven reserve officers and a full support staff.

The Adelanto Police Department maintains two canine officers, a narcotics enforcement team and a bicycle patrol. A mounted police unit serves as a valuable resource in search-and-rescue operations.

Additionally, the department participates in a multi-agency drug interdiction task force that concentrates on major highways throughout the High Desert.

Citizen involvement with the department is facilitated through active business and neighborhood watch programs, as well as a thriving Citizen's Patrol program with more than 30 volunteers.

Fire

The Adelanto Fire Department maintains two stations in the city.

Station One is located in north Adelanto, and serves as a base for Valley Ambulance and paramedics. Station Two serves as the department's headquarters, and is located in Adelanto's bustling industrial park. Station Two is the base for the High Desert's only emergency air ambulance service, Mercy Air.

The Adelanto Fire Department employs 12 full-time firefighters, and 30 paid-call firefighters. The department maintains four engines, a water tender, and a hazardous materials response unit.

The proactive department works closely with business and industry, both in the pre-planning stages and on an ongoing basis, to maintain the highest standards of fire safety.

Library

San Bernardino County maintains a branch library in Adelanto, serving readers of all ages. Books not carried in the library's collection may be obtained from other county branches for a nominal fee.

Financial, Medical

Desert Community Bank maintains a branch office on Rancho Road, serving the financial needs of the businesses and residents of Adelanto.

Several health care facilities are located in the city. Three hospitals are within a 20-minute drive.

Public Utilities

The City of Adelanto owns and operates its own water utility and is currently a member of the Victor Valley Waste Water Reclamation Authority. The city is currently constructing its own waste water treatment facility.

Electrical service is provided by Southern California Edison, and natural gas service is provided by Southwest Gas and The Gas Company.

The City of Adelanto: An Overview

Adelanto. In Spanish, the word means "to go forward," or "to progress." Throughout its history, our city has demonstrated a strong commitment to live up to its name.

Adelanto was founded in 1915 by E.H. Richardson, the inventor of what became the Hotpoint Electric Iron. He sold his patent and purchased land for \$75,000. He had planned to develop one of the first master planned communities in Southern California. Richardson subdivided his land into one-acre plots, which he hoped to sell to veterans with respiratory ailments suffered during World War I. He also hoped to build a respiratory hospital. While Richardson never fully realized his dream, it was his planning that laid the foundation for what is currently the city of Adelanto.

Acre after acre of deciduous fruit trees once grew in the city. Famous throughout the state for fresh fruit and cider, the orchards thrived until the depression, when they were replaced by poultry ranches.

As the wartime emergency developed early in 1941, the Victorville Army Air Field was established on land within the Adelanto sphere of influence. In

September 1950, it was named George Air Force Base in honor of the late Brigadier General Harold H. George.

Adelanto continued as a "community services district" until 1970, when the city incorporated, and Adelanto became San Bernardino County's smallest city. The city became a charter city in November 1992.

Major companies have brought a solid tax base to the city, and the population has grown approximately 50 percent over the past six years.

The city limits encompass approximately 52 square miles. Its sphere of influence extends that figure to approximately 77 square miles.

The city's population is approximately 15,000, but estimates from independent developers range as high as 17,000.

Elevation ranges from 2,894 to 3,100. Winter night temperatures reach as low as 15 degrees, and snow falls approximately twice each year. There are approximately 32 days in the year when the temperature is over 100 degrees.

Prevailing winds from the southwest prevent smog from hovering in the High Desert.

Business, Industry and Employment

Adelanto's pro-growth, pro-business philosophy makes the city an ideal location for business and industry.

Thriving industrial parks offer site-ready parcels of land at a very competitive price. Additionally, the Redevelopment Agency will grant the client deferred payment and no-interest loans. With environmental impact reports already complete, manufacturers can look forward to moving in and starting operations in a fraction of the time required by other cities.

Adelanto is home to several large trucking companies, providing manufacturers with competitive transportation services for shipping products. Additionally, Southern California International Airport is located just minutes from Adelanto's business centers, opening the doors for a wide variety of transportation options.

Since 1989, more than 80 companies have selected Adelanto as the premier Southern California location to do business. A wide variety of products, from luxury sport-fishing boats to balsa wood gliders, are currently manufactured in Adelanto. And the High Desert's rapidly-growing population provides employers with a qualified labor pool.

The city has issued 782 business licenses. In 1996, the city issued 151 residential building permits, and 30 commercial building permits.

Label House	38

The Adelanto Chamber of Commerce

The Adelanto Chamber of Commerce was formed in 1956. Its members come from a variety of business and community entities and backgrounds, but share a common goal of working toward the betterment of Adelanto.

The Chamber of Commerce is a voluntary organization whose members largely come from the business community located in or serving the city of Adelanto. Operating as an independent, non-profit organization, the Chamber enables business and professional people to collectively promote economic growth and progress in the city of Adelanto.

The Chamber's work toward implementing this philosophy has been successful for more than 40 years because of the commitment on the part of active, motivated leaders. Together, these volunteers do what no service club, governmental agency or individual business could do alone. The Chamber enhances and promotes Adelanto and the surrounding area as a great place to live and do business.

In addition to offering members a variety of professional and social networking opportunities, the Chamber provides a great deal of support to local schools, youth organizations and other community programs.

The Chamber is a co-sponsor of the annual Adelanto Grand Prix, a two-day event that brings thousands of riders and spectators into the city each February.

Chamber representatives provide information to business persons and individuals interested in moving to the city, and offers service referrals to Chamber members.

Chamber representatives also help to promote new businesses by organizing and participating in ground-breaking and ribbon cutting ceremonies.

The Chamber maintains an active, ongoing relationship with other area chambers to promote the Victor Valley as a dynamic, pro-growth area in which to do business.

Prospective members are welcome to attend one of the Chamber's monthly membership luncheons. The luncheons, which feature interesting speakers, are held the second Wednesday of each month at 11:30 a.m. at Mavericks Stadium. Information about the luncheons or the area can be obtained by calling the Chamber at (760) 246-5711.

Adelanto Chamber of Commerce
